Subject index

Absenteeism, of teachers
  as a cause of poor school quality, 98–99
  extent and causes of, in Peruvian primary schools, 117–136
    community characteristics
      poverty, 127
      remoteness, 127–128
    competition from private schooling, 131–132
    financial incentives
      contract status, 129
      salary, 128–129
    monitoring and discipline
      bottom-up monitoring by parents, 130
      top-down monitoring, 129–130
    non-pecuniary incentives, 130–131
      ties to the local area and school, 130–131
      working conditions, school infrastructure and equipment, 131
    teacher demographic characteristics, 128
Absolutist, epistemological understanding, 43–56
  patterns
    across domains of judgments, 48–50
    across gender, grade level, and curriculum, 50–52
Academic achievement, of children in rural Viet Nam
  determinants of, 168–172
  effects of social class and school conditions on, 153–175
Accountability
  and standards, emergence of, 234–235
  and teacher empowerment in Guinea, 302–314
  implementation of explicit and implicit mechanisms of, in Germany, 320–320
  locus and character of control over teacher quality, 284–285
  of teacher, Rainbow Plan's multiple levels of, 292–300
    community, 295–296
    individual, 298–300
    national, 293–294
    school, 296–298
  reciprocal, of Ministry of Education and teachers, 305–312
Achievement
  in biology of students, effects of guided inquiry and expository teaching on, 216–229
  in mathematics of Chilean students, 102–116
  of children in rural areas in Viet Nam
    determinants of, 168–172
    effects of socioeconomic status, school and community factors on, 99, 153–175
Action Education, as hybrid model of teacher development, 287–288
Association of Chilean Municipalities, role in development of teacher performance evaluation, 254–266
Attitude to Biology Scale (ABS), efficacy of guided inquiry and expository teaching methods on achievement and attitude to biology, 216–229

Beliefs
  epistemic, domain specificity of, 85–95
  epistemological
    domain generality–specificity of theoretical and methodological difficulties, 7–27
    dual nature of, 28–42
      differentially related to motivation, 36–37
      domain-specific, develop from more general beliefs, 37–39
      domain-specific, emerge when beliefs are assessed at domain level, 35–36
    introduction to domain generality *vs.* domain specificity of, 1–6
  of students, mathematics-related, epistemic dimensions of, 57–70
Biology Achievement Test (BAT), efficacy of guided inquiry and expository teaching methods on achievement and attitude to biology, 216–229
Brazil
  educational inequality in

0883-0355/$ - see front matter
doi:10.1016/j.ijer.2007.09.001

impact of gender, 183
impact of race, 184
impact of region of residence, 183–184
impact of socioeconomic status, 183
measurement of cognitive achievement gaps and inequalities in, 176–187

Canada, effect of SCT on youths' academic achievement in, 380–403
Children
characteristics of, as determinant of school participation of children in Sri Lanka, 148
determinants of school participation of, 99
in rural areas in Viet Nam
effects of socioeconomic status, school and community factors on enrollment and achievement of, 99
factors affecting school participation of, 153–175
community and school disparities, 162–164
educational enrollment, 166–168
household factors, 168–172
quality and quantity of school enrollment, 160–162
school factors, 164–166
trends in school enrollment, 158
Chile
mathematics achievement of students in, 102–116
mathematics curriculum, 111–112
school resources, 113–114
social and economic context in which the schools operate, 109–111
teacher quality, 113
performance in TIMSS 1998/99, 104–105
schooling system in, 103–104
teacher performance evaluation, 254–266, 262–263
vs. countries with comparable economic conditions, 106–115
China, reform as hybrid model of teaching and teacher development in, 279–289
Class size
effect on primary schools in Poland, 202–215
effect on student achievement in Poland, 100
Classroom, challenges in operationalizing cultural practices in, 404–419
Classroom activities, as short-term early literacy intervention for low-income Costa Rican kindergartens, 100, 193
Classroom interventions, early, impact on low-income Costa Rican kindergartens, 193
Cognitive achievement
in Brazilian education, measurement of gaps and inequalities in, 99, 176–187, 178–180
Community
as determinant of children's school participation in Sri Lanka, 99, 149
effect on children's enrollment and achievement in rural areas in Viet Nam, 99, 153–175
Costa Rica
different early interventions for low-income kindergartens in, 188–201
classroom interventions, 193
family interventions, 192–193
tutorial interventions, 193
Costs, of schooling, as determinant of school participation of children in Sri Lanka, 149–150
Cultural practices, in classroom and peer communities, challenges in operationalizing of, 404–419

Denmark, teacher accountability and professional identity in
ENCOMPASS study, 247–249
secondary teachers, 247–249
Domain
generality *vs.* specificity
of epistemological beliefs
introduction to, 1–6
theoretical and methodological difficulties, 7–27
specificity, of personal epistemology, 85–95
Dual nature, of epistemological beliefs, 28–42
Dutch orthography, 344–345

Education
equity and quality of
for education improvement in Chile, cross-national research on, 98
in Brazil
impact of gender, 183
impact of race, 184
impact of region of residence, 183–184
impact of socioeconomic status, 183
research on, 99
research in developing and transition countries, 97–101
Chile, 98
Costa Rica, 100
Nigeria, 100
Peru, 98–99

Poland, 100
Sri Lanka, 99
Viet Nam, 99
factors affecting school participation of children in Sri Lanka, 137–152
child characteristics, 148
direct costs of schooling and access to schools, 149–150
household characteristics, 148–149
location and community-level characteristics, 149
school quality indicators, 149
of teachers, educational reform and global regulation of, 231–241
convergence and divergence in teaching reform, 239–240
in Germany, 315–324
in Mexico, 267–278
reforming policies and institutions, 236–237
teachers roles and images of effective teaching, 237–239
schools in Sri Lanka, 139–141
Education journals
impact factor of, 368–372
limitations in the calculation, applications and general overview of impact factor of, 362–379
Educational interventions, early, impact on low-income Costa Rican kindergartens, 188–201
classroom interventions, 193
family interventions, 192–193
tutorial interventions, 193
Educational reform
and globalization in German teacher education, 315–324
and institutions that educate and regulate teachers, 234
and the global regulation of teachers' education, development and work, 231–241
convergence and divergence in teaching reform, 239–240
reforming policies and institutions, 236–237
teachers roles and images of effective teaching, 237–239
as hybrid model of teaching and teacher development in China, 279–289
changes in structure of teacher education in Germany, 317–322
influence on teachers' work in Japan, 290–301
lack of systematic and rigorous empirical evidence, 235–236
of teachers,
in Mexico, 269–273
ENCOMPASS study, secondary teachers in England, France and Denmark, 247–249
England, teacher accountability and professional identity in
after restructuring, 245–247
ENCOMPASS study, 247–249
PACE and STEP study, 245–247
prior to restructuring, 244–245
secondary teachers, 247–249
Enrollment, of children in rural areas in Viet Nam
effects of socioeconomic status, school and community factors on, 99, 153–175, 166–168
quality and quantity, 160–162
trends in, 158
Epistemic beliefs, domain specificity of, 85–95
Epistemic dimensions, of students' mathematics-related belief systems, 57–70
Epistemological beliefs
domain generality, of practicing teachers in context of elementary school teaching, 71–84
domain generality–specificity of, theoretical and methodological difficulties, 7–27
dual nature of, 28–42
differentially related to motivation, 36–37
domain-specific
develop from more general beliefs, 37–39
emerge when beliefs are assessed at domain level, 35–36
introduction to domain generality *vs.* domain specificity of, 1–6
Epistemological understanding, 43–56
patterns across domains of judgments, 48–50
patterns across gender, grade level, and curriculum, 50–52
Epistemology, personal, domain specificity of, 85–95
Evaluativist, epistemological understanding, 43–56
patterns across domains of judgments, 48–50
patterns across gender, grade level, and curriculum, 50–52
Expository teaching
effect on biology achievement and attitudes toward biology of students, 100, 216–229
efficacy as teaching strategy, 100

Family, and school social capital and youths' math scores in Canada, Japan, and United States, 380–403, 387–391
Family interventions, early, impact on low-income Costa Rican kindergartens, 100, 192–193

France, teacher accountability and professional identity in
after restructuring, 245–247
ENCOMPASS study, 247–249
PACE and STEP study, 245–247
primary teachers, 244–247
prior to restructuring, 244–245
secondary teachers, 247–249

Gender, impact on educational inequality in Brazil, 183
Germany
changes in structure of teacher education in, 317–322
globalization and educational reform in teacher education in, 315–324
Globalization
and educational reform in German teacher education, 315–324
conceptions of, 232
state as strong force mediating the effects of, 233–234
Guided inquiry
effect on biology achievement and attitudes toward biology of students, 100, 216–229
efficacy as teaching strategy, 100
Guinea, accountability and teacher empowerment in, 302–314

Household, as determinant of children's school participation in Sri Lanka, 99, 148–149

ICQ language, short forms, as feature of short messages, 335
Ideal teachers, consequences for the concept of, 321–322
Identity of teachers, and national context, 255–256
Impact factor, of education journals, 368–372
limitations in the calculation of, and its applications and general overview, 362–379
Implicit learning, 358
Incidental learning, 344
Information and Communication Technologies (ICT), and spelling, 342–343
Informational feedback, *vs.* knowledge-of-results, 343–344
Institutional theory, 233
Institutions, and educational reforms that educate and regulate teachers, 234

Japan
effect of SCT on youths' academic achievement in, 380–403
influence of educational reform on teachers' work in, 290–301
Rainbow Plan
implications on teachers' work, 290–301
multiple levels of teacher accountability, 292–300
community, 295–296
individual, 298–300
national, 293–294
prefecture, 294–295
school, 296–298
Journal Citation Reports (JCR), calculation of impact factor and the main problems surrounding it, 364–367
Journals, in education
impact factor of, 368–372
limitations in the calculation, applications and general overview of impact factor of, 362–379

Kindergarten students, low-income Costa Ricans, impact of different early literacy interventions, 188–201
classroom interventions, 193
family interventions, 192–193
tutorial interventions, 193
Knowledge-of-results, *vs.* informational feedback, 343–344
Knowledge transfer, 344

Literacy intervention, short-term early, effective for providing early educational opportunities for low-income Costa Rican kindergartens, 100
Location, as determinant of school participation of children in Sri Lanka, 149

Malaysia, out-of-school practices in writing short messages, 325–340
insider status, 336
Penang English, 333–335
short forms or ICQ language, 335
Mathematics
conceptions of, 414–415
effect of SCT on youths' achievement in, outside of the US context, 380–403
operationalizing cultural practices in relation to learning and practicing of, 413–414
students' belief systems related to, epistemic dimensions of, 57–70

youths' scores in, and SCT, 393–394, 396–398
Mathematics achievement
of Chilean students, 102–116
mathematics curriculum, 111–112
school resources, 113–114
social and economic context in which the schools operate, 109–111
teacher quality, 113
Mathematics curriculum, 111–112
Methodology, difficulties in domain generality–epistemological beliefs, 7–27
Mexico
educational reform of teachers in, 269–273
regulation of teacher education and work in, 267–278
Carrera Magisterial, 274–276
Consejos tecnicos escolares, 273–274
reformed curriculum, 274
Ministry of Education
and teachers, reciprocal accountability of, 305–312
role in development of teacher performance evaluation, 254–266
Multiplist, epistemological understanding, 43–56
patterns across domains of judgments, 48–50
patterns across gender, grade level, and curriculum, 50–52

Netherlands, spelling feedback in an ICT-learning environment, 341–361
knowledge-of-results, *vs.* informational feedback, 343–344

Out-of-school literacy, 327–329
writing of short messages of Malaysian high school students, 325–340
insider status, 336
Penang English, 333–335
short forms or ICQ language, 335

Pedagogy, culturally relevant, inform theory and practice in classrooms, 404–419
Peer communities, challenges in operationalizing cultural practices in, 404–419
Penang English, 333–335
Performance evaluation, development of, for teachers in Chile, 262–263
Association of Chilean Municipalities in, 3256–264
Ministry of Education in, 256–264
Teachers' Union in, 256–264
Personal epistemology, domain specificity of, 85–95
Peru, extent and causes of absence of teachers in primary schools in, 117–136
community characteristics
poverty, 127
remoteness, 127–128
competition from private schooling, 131–132
financial incentives
contract status, 129
salary, 128–129
monitoring and discipline
bottom-up monitoring by parents, 130
top-down monitoring, 129–130
non-pecuniary incentives, 130–131
ties to the local area and school, 130–131
working conditions, school infrastructure and equipment, 131
teacher demographic characteristics, 128
Poland, effect of class size
on primary schools, 202–215
on student achievement, 100
Primary, Assessment, Curriculum and Experience (PACE) study, 245–247
Primary schools
in Peru, extent and causes of absence of teachers in, 117–136
community characteristics
poverty, 127
remoteness, 127–128
competition from private schooling, 131–132
financial incentives
contract status, 129
salary, 128–129
monitoring and discipline
bottom-up monitoring by parents, 130
top-down monitoring, 129–130
non-pecuniary incentives, 130–131
ties to the local area and school, 130–131
working conditions, school infrastructure and equipment, 131
teacher demographic characteristics, 128
in Poland, effect of class size on, 202–215
Professional development, of teachers
educational reform and global regulation of, 231–241
convergence and divergence in teaching reform, 239–240
reforming policies and institutions, 236–237
teachers roles and images of effective teaching, 237–239

in Europe, impact of national education policy and policy change on, 242–253
Programs for small grants to schools, 302–314

Race, impact on educational inequality in Brazil, 184
Rainbow Plan
implications on teachers' work in Japan, 291
multiple levels of teacher accountability, 292–300
community, 295–296
individual, 298–300
national, 293–294
prefecture, 294–295
school, 296–298
Region of residence, impact on educational inequality in Brazil, 183–184
Research
cross-national, on quality of education for education improvement in Chile, 98
education equity and quality in developing and transition countries, 97–101

School, and family social capital and youths' math scores in Canada, Japan, and United States, 380–403, 391–393
School education in Sri Lanka, 139–141
School factors, effect on children's enrollment and achievement in rural areas in Viet Nam, 99, 164–166
School-level information, as determinant of children's school participation, 99
School participation, of children
determinants of, 99
in Sri Lanka, factors affecting, 137–152
children's characteristics, 148
direct costs of schooling and access to schools, 149–150
household characteristics, 148–149
location and community-level characteristics, 149
school quality indicators, 149
in Viet Nam
effects of social class and school conditions on, 153–175
school quality as determinant of, 99
School quality
as determinant of school participation
in Sri Lanka, 149
in Viet Nam, 99, 153–175
as driver of both demand for education and educational effectiveness, 98
poor, major causes of, in Peru, 98–99
School resources, 113–114
Schooling system in Chile, 103–104
Schools, access to, as determinant of school participation of children in Sri Lanka, 149–150
Scientific Literacy Test (SLT), efficacy of guided inquiry and expository teaching methods on achievement in and attitude to biology, 216–229
Short messages, out-of-school practices of Malaysian high school students in writing of, 325–340
insider status, 336
Penang English, 333–335
short forms or ICQ language, 335
Social capital theory (SCT)
and youths' math scores, 393–394, 396–398
effect on youths' academic achievement outside of the US context, 380–403
Social class, effects on educational enrollment and achievement of boys and girls in rural Viet Nam, 153–175
Social Science Citation Index (SSCI), 362–379
Socioeconomic status
impact on educational inequality in Brazil, 183
of parents, effect on children's enrollment and achievement in rural areas in Viet Nam, 99, 153–175
Spelling feedback, in an ICT-learning environment, 341–361
Dutch orthography, 344–345
ICT and spelling, 342–343
knowledge of results *vs.* informational feedback, 343–344
knowledge transfer, 344
spelling proficiency, 345–346
training effects, 350–352
training efficiency, 353–355
transfer effects, 352–353
Spelling proficiency, 345–346
Sri Lanka
factors affecting school participation of children in, 137–152
children's characteristics, 148
direct costs of schooling and access to schools, 149–150
household characteristics, 148–149
location and community-level characteristics, 149
school quality indicators, 149
school education in, 139–141

State, as strong force mediating the effects of globalization, 233–234
Student achievement, in Poland, effect of class size on, 100, 202–215
Student beliefs, mathematics-related, epistemic dimensions of, 57–70
Students
  grade 2, Dutch, effectiveness of knowledge-of-results *vs.* informational feedback on spelling performance of, 341–361
  high school, Malaysian, out-of-school practices in writing short messages, 325–340
    insider status, 336
    Penang English, 333–335
    short forms or ICQ language, 335
Systems, Teachers and Policy Change (STEP), 245–247

Teacher development
  Action Education as hybrid model of, 287–288
  and reform initiatives in Guinea, 303–305
  and teaching in China, reform as hybrid model of, 279–289
  institutionalization of practices related to, 282–286
  through hybridized models of reform, global and local approaches, 286–288
Teacher-driven school improvement program (PPSE), 302–314
Teacher empowerment, and accountability in Guinea, 302–314
Teacher performance evaluation in Chile, 254–266
Teacher quality, 113
Teacher responsibility
  in poor school quality, 98–99
Teacher Statute, in improvement of teachers' conditions of employment and salaries, 256
